

Brightening Eye Cream

Product Size: 15 ml

Item No 50576

A lightweight, visibly brightening, and hydrating eye cream powered by plants. Clinically proven to visibly reduce the appearance of dark circles, under-eye puffiness, wrinkles, and fine lines in just 14 days.

Ageing naturally doesn't have to mean looking tired. This multitasking eye cream helps immediately refresh and visibly brighten skin around the eyes, while minimising the appearance of dark circles, crow's feet, and under-eye bags over time with continued use. Powered by plant-based actives—not harsh synthetics—it's enriched with antioxidants, glacier-derived succinic acid, and botanical stem cells from edelweiss and tuberose to protect against environmental stressors and visible signs of ageing.

Your purchase makes an impact. This under-eye cream is made with sustainably sourced botanicals, including Lemongrass essential oil from grass farmed in southern India—supporting local farmers and their communities with every swipe.

Benefits and Features

- Minimises the appearance of dark circles and under-eye puffiness.
- Rich in antioxidants to protect from environmental aggressors and reduce visible signs of ageing, including fine lines and crow's feet.
- Delivers instant hydration for a fresh, rested look.
- Features a cooling, depuffing metal applicator.

Directions

Gently pat a pea-sized amount under and around eyes morning and night. Use the cooling metal applicator to gently massage skin for extra depuffing action.

Cautions

Keep out of reach of children. For external use only. Avoid contact with eyes. Discontinue use if irritation occurs. If irritation persists, contact your doctor.

Brightening Eye Cream

- 86% said their eye area looks more toned

- 81% said their fine lines were less visible
- 81% said their eye area looked brighter
- 76% said their eye area feels smoother

Why Plant Stem Cells?

Our Brightening Eye Cream pairs botanical extracts with a phyto stem cell complex. Produced from a single sample of each plant, phyto stem cells offer an even more sustainable way to harness nature's power.

What's inside the stem cell complex?

- Tuberosa flower cells provide instant radiance and help minimize the look of dark circles and under-eye puffiness.
- Edelweiss cell culture extract helps smooth the appearance of crow's feet wrinkles.
