

# VANILLA

Product Size 5 ml Item No. 35113

With its warm, rich, slightly sweet aroma, vanilla is one of the most popular and recognisable fragrances throughout the world for a reason. Young Living's exclusive Vanilla oleoresin has a gentle, welcoming personality with a balancing aroma that evokes pleasant memories when applied topically.

Extracted from beans grown in the north-western region of Madagascar, our ethically sourced, pure Vanilla oleoresin is made with a unique extraction method developed for Young Living. This process helps our Vanilla retain its rich, classic aroma and blend especially well with Young Living essential oils. Obtaining just the right Vanilla oleoresin involves the removal of naturally sourced ethyl alcohol from French sugar beets, at which point the product is processed with fractionated coconut oil. While many vanilla products on the market are synthetic, Young Living Vanilla is pure and quality tested to meet our rigorous Seed to Seal® quality commitment.

Vanilla has a pure, rich aroma that may change slightly as you use it in different ways. It also enhances and complements a wide variety of other aromas. Apply Vanilla to create a comforting, welcoming feeling and to enjoy its naturally calming aroma. Blend or layer it with your favourite Young Living essential oils to create your own personal fragrance.

## KEY INGREDIENTS

- Pure, Seed to Seal-certified Vanilla oleoresin in fractionated coconut oil

## BENEFITS AND FEATURES

- Warm, rich, sweet aroma
- Balancing aroma
- Calming scent
- Conditions and moisturises skin and hair
- Blends beautifully with essential oils
- Creates a comforting, welcoming feeling when applied
- Evokes pleasant memories with its nostalgic aroma when inhaled
- Contains the naturally occurring constituents of vanillin and vanillic acid

# VANILLA

## PRODUCT BACKGROUND

Vanilla is produced from *Vanilla planifolia*, an orchid that grows long vanilla bean pods. The process of obtaining Vanilla is extensive, as it can take up to four years for the vine to mature. The vine produces orchid blossoms that last only 24 hours and must be pollinated by hand within 8 to 12 hours for the bean pod to grow. The entire process—growing, pollinating, drying, curing, and preparing for export—takes around one year.

Young Living's Vanilla is not strictly an extract or an absolute, both of which contain mostly alcohol and do not blend well with essential oils. Noticing these flaws in mainstream vanilla extracts and absolutes, the D. Gary Young Research Institute worked to find a vanilla product that would meet our Seed to Seal quality commitment and blend well with our essential oils. They searched for more than a year to find the right product, and by using a first-of-its-kind extraction method with the vanilla oleoresin and fractionated coconut oil, they finally found a Vanilla that is not only pure, but also blends beautifully with essential oils.

## DIRECTIONS

Apply to desired area. In case of sensitivity, dilute as needed in Young Living V-6® Enhanced Vegetable Oil Complex.

## SUGGESTED USE

- Create a warm, comforting environment with Vanilla's calming aroma
- Use as a foundation scent for home fragrances and blend with Cinnamon, Ylang Ylang, Orange, or any of your other favourite oils
- Blend Vanilla with your favourite essential oils and create your own personal fragrance

## CAUTIONS

Keep out of reach of children. For external use only. Keep away from eyes and mucous membranes. If you are pregnant, nursing, taking medication, or have a medical condition, consult a health care professional prior to use.

## INGREDIENTS

Vanilla planifolia (vanilla) fruit extract and caprylic/capric triglyceride (fractionated coconut oil)

Pure Vanilla oleoresin in fractionated coconut oil
