PRODUCT BACKGROUND

Much of Young Living's Orange essential oil comes from oranges grown in the hills of Witwatersrand, South Africa. This Seed to Seal®-certified partner, the Amanzi Amahle Cooperative Farm and Distillery, works with local growers throughout the region to produce some of Young Living's most popular essential oils. The production of Orange essential oil is virtually a zero-waste process. Not only are the orange peels cold-pressed for essential oil, but the remaining oranges are used for either fruit or juice. The skin, pulp and core are also dried, and the pith is used for pectin. Cinnamon Bark essential oil comes from the steam-distilled bark of the tropical evergreen tree, which is native to Sri Lanka. The bright, energising Orange essential oil pairs with the warmth of Cinnamon Bark and the grounding aroma of Northern Lights Black Spruce for an aroma that is sure to create a festive holiday spirit.

DIRECTIONS

Pump foam onto hands, lather, and then rinse thoroughly.
