

YOUNG LIVING®

ESSENTIAL OILS

The Young Living

DIFFERENCE

Our unique Seed to Seal® commitment and its three pillars—Sourcing, Science, Standards—ensures that the cultivation, wild-crafting, distillation, quality testing, and legal compliance of the essential oils and products produced by Young Living are done without compromise.

SOURCING

Sourcing guides the process by which we obtain essential oils from our corporate farms, partner farms, and Seed to Seal-certified suppliers by ensuring that the production of these products is of the highest quality.

SCIENCE

Science guides the formulation and stringent testing of our essential oils, products, and ingredients to deliver pure, effective essential oils and innovative wellness products that meet our rigorous quality standards.

STANDARDS

Standards guides the compliance measures taken throughout our sourcing process to ensure all domestic and international legal guidelines are adhered to as part of our effort to protect plant species throughout the world.
