Tabiona, Utah, U.S.

SKYRIDER WILDERNESS RANCH

Established 2017

Botanical sourced from this ranch: Einkorn

RANCH LOCATION AND BACKGROUND

The Skyrider Wilderness Ranch—nestled in the hills of Tabiona, Utah, and home to stunning vistas and wildlife—held a special place in Young Living Founder D. Gary Young's heart. The ranch occupies 28 square miles in one of the largest pinyon pine forests in the world. It's also home to 8–12 beehive colonies that pollinate the plants and help maintain a healthy ecosystem.

BOTANICAL BACKGROUND

At this ranch Young Living grows einkorn—an ancient grain and one of the first plants cultivated by early farmers. The first signs of domesticated einkorn date back to nearly 10,000 years ago.

Skyrider Wilderness Ranch is known for its einkorn - an ancient grain.

TESTING AND HARVESTING

The Skyrider Wilderness Ranch grows einkorn and currently has test plots for botanicals that include hemp, melissa, hyssop, clary sage and dragonhead.

HOW THE RANCH GOT ITS START

Young Living Co-Founders Gary and Mary Young purchased the ranch in 2017. At the time, the property was—and still operates as—a working elk and bison ranch. The region has always held a special place in their hearts and serves as Gary's final resting place.

"I like to tell people, if you didn't get a chance to know Gary in person, come to Skyrider Wilderness Ranch," says Ranch Manager Skyler Olson. "Everything about the place is Gary."

DID YOU KNOW?

The ranch is over 18,000 acres and is a working elk and bison ranch.

Historically, Skyrider Wilderness Ranch operated as a cattle ranch.

The elevation where the main lodge sits is at 6,800 feet above sea level.

It's common for several feet of snow to fall overnight during seasonal storms.

SEED TO SEAL

We discover, distill and deliver the world's purest and most potent essential oils and oil-infused products. To maintain that standard, we created our Seed to Seal® quality commitment as a set of rigorous quality benchmarks that put people and planet first. Seed to Seal's three pillars—Sourcing, Science and Standards—let you fall in love with Young Living products, knowing that inside each bottle, tube, box or bag is a powerful product with a sustainable story. For more detailed information on our Seed to Seal pillars, please visit SeedtoSeal.com.

LOOKING AFTER THE ENVIRONMENT AND COMMUNITY

Championing nature conservation. The ranch is also the site of the D. Gary Young Wildlife Sanctuary, a conservation easement held by The Nature Conservancy that spans about 10,880 acres (17 square miles). The donation of this land was the largest in the Utah chapter's history.

Protecting the local wildlife. The sanctuary is part of an area called the "Utah Serengeti" due to the large herds of elk and deer that migrate through there. The ranch maintains sections of ground specifically to help the animals through the harsh winters.

Implementing renewable energy. The ranch uses wind energy to help aerate trout ponds found on the property.

Donating to wildlife and veterans. Each year, Skyrider Wilderness Ranch works with local conservation groups to donate an elk hunt. One hundred percent of the proceeds go toward funding local wildlife conservation efforts. The ranch also donates two hunts a year with the proceeds donated to injured or otherwise in-need servicemen and women.
