

VANILLA

With the warm, rich, slightly sweet aroma, vanilla is one of the most popular and recognisable fragrances throughout the world for a reason. Young Living's exclusive Vanilla oleoresin has a pure, gentle, welcoming personality with a balancing aroma that evokes pleasant memories when diffused.

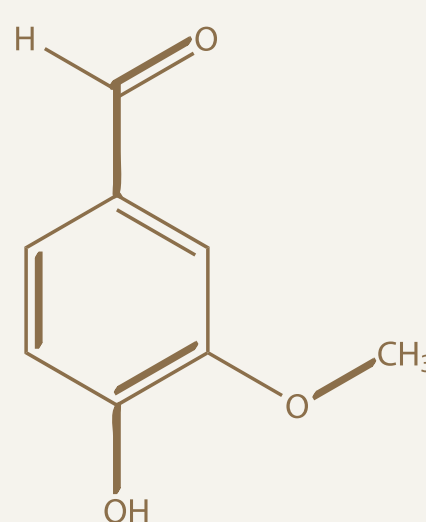

Extracted from beans grown in the northwestern region of Madagascar, Young Living's **Vanilla oleoresin is distinctive due to its unique extraction method** created by Young Living that helps it blend well with essential oils, unlike traditional vanilla extracts.

Vanilla oleoresin is produced from *Vanilla planifolia*, an orchid that grows **long vanilla bean pods**.

Not only does Vanilla smell amazing, but you can **apply it topically** to skin and hair to help condition and moisturise.

Vanilla contains **naturally occurring constituents** of vanillin and vanillic acid.

Embracing its **rich, warm, slightly sweet scent**, use Vanilla as your foundation to create beautiful home scents.
