**In what year did you join Young Living?**

I joined Young Living in 2001.

**How did you find out about Young Living & who introduced you to Young Living?**

I found out about Young Living from Artemis (Crown Diamond Member). She was launching her book at a small country fair in Caloundra, and she invited me to her essential oil party at her place. I enjoy connecting with people, and as I was new to area, it was a great opportunity to meet people. I fell in love with Joy™ and Valor® essential oil blends. I had never smelled anything like them - so natural, and as I love nature, they seemed a perfect choice for me. I put Joy on my heart and Valor on the back of my neck, after that I felt instantly enlightened. It was such a beautiful feeling that I simply wanted more.

**What was your occupation before Young Living?**

I was a beauty therapist in my 20s and learned about traditional use of essential oils. Wanting adventure, I found work out in the bush and worked as a governess, jillaroo and cook on different cattle stations in the Northern Territory and Western Australia. I settled at a later date with my partner and had 3 wonderful children and worked on our Far North Queensland property in primary production for about 15 years. Life brought another round of changes, and I became a single mum in my 40s. I then moved to the Sunshine Coast and started a new city-type life.

**What makes Young Living unique?**

Our beautiful farms and Gary Young's vision. He is an amazing man. The vibration of nature is in every bottle - which you don't get with most products. A lot of people forget where their food comes from. The same applies to essential oils in the bottles. People forget where their water supply comes from and the importance of our natural resources. Everyone needs to know the beginning of their food chain and how the products were made that they consume or use.

Usually that means getting to know your farmer. As with Young Living's essential oils, we have Gary Young as our farmer and we all have the opportunity to get to know him and see his farming skills amongst other skills, like the unique distilleries he designed.

#### How has your life changed since you joined Young Living?

When I joined Young Living, I studied as a teacher's aid and looked after my 3 teenage children. I wasn't in it for the business to start with; instead I used the Young Living products just for our family. I did some of the big trade shows and networked with people that I knew. I reached the rank of Silver a few years after my first convention in 2005, called Gold Of The Gods. At the convention, I really saw what Young Living was about. I loved it all! At that point, I chose the name 'Drops of Gold' as my business name. Momentum was the key and it seemed to happen very quickly once I made that intent that this was now my Drops of Gold Young Living business.

In 2016, I moved back to North Queensland and bought a picturesque 72 acres. I call this my tropical paradise - this is where I go to rest, regroup and plan when I am not travelling interstate to visit my team.

Recently, I have been able to volunteer as part of a non-profit organisation to support struggling, remote Aussie families on the land - I worked on a cattle station in the Queensland outback. My Young Living business has helped me in being able to do this.

When I am home, I am always available for the local Mission Beach Wildcare Inc. as a carer for injured or orphaned native wildlife. I have also been able to donate items to the community school in my area and I am able now to support my team members more in their journey with Young Living.

## MEMBER SUCCESS STORY

### PLATINUM

#### What is your favourite Young Living product? Why? Explain what the benefits are to you.

The nutritional essentials are very good. Ningxia Red® is my favourite as well as the 3 G's - Gathering, Gratitude and Grounding - all have an amazing synergy when used together or singularly. They're perfect for those times when you need extra focus.

Because of my beauty therapy background, I really appreciate the benefits of Lavender, Frankincense and Patchouli essential oils and I use one of these in my skin care routine daily.

#### Were you skeptical about essential oils and the Young Living opportunity before?

No, I have never been sceptical about the Young Living opportunity. After the 'Gold of the Gods' convention, I found my purpose and had the intention to share the Young Living products with friends. I saw firsthand what the company was about.

#### What changed your mind about Young Living?

The company's honesty, the ethics of Young Living & the feeling of being at the convention. Also, the products are so pure. Everything is transparent and I could see where things came from.

#### Why would you recommend others join Young Living?

I would recommend for others to join Young Living so that they can live the life they want and help others. People should join because Young Living is ethical, has ethical motives and cares for the environment, the community and its people. If you join Young Living, it's the beginning of a journey to live a more natural life. People become more aware of why good farming practices are so important and it is amazing to have the opportunities to visit the farms and distilleries to see this. Young Living is so environmentally conscious.

Other companies may use chemicals in their products as well as grow their products on farms with toxic chemicals. These products do not resonate within our bodies and people eventually have side effects from it; whereas we teach people about nature.
