

In the spotlight with:

Naomi Wells

In what year did you join Young Living?

2017.

How did you find out about Young Living & who introduced you to Young Living?

My mum had been using Young Living for a little while and she gave me some oils to try I was blown away from the impact that the essential oils had. Needless to say, I was hooked.

What was your occupation before joining Young Living?

Primary School Teacher.

What makes Young Living unique?

The quality of products and the community that comes along with it. No other company has a commitment to their products and their people. I have always been blown away by how much care and thought that Young Living put into everything they do. From their Seed to Seal promise, to the love they pour into their members and distributors is incredible.

How has your life changed since you joined Young Living?

Young Living has given so much back to my family that it's hard to know where to even begin.

We now have a very proactive approach to our family's wellness. We have the knowledge and tools that we get to share with our friends and family, and most importantly, create healthy habits for our son. It's empowering to know that our wellness is in our hands and seeing other people follow in those footsteps is something really special.

We definitely have more time to say yes to the things we want to do because the business opportunity has allowed us to do so. We create our own schedule, rather than being in the 9-5 grind. Young Living has allowed me to give up my full time teaching job and spend time at home focusing on my Young Living business and raising my son with my husband. I have been lucky enough to have travelled to see the farms, meet people from my community in person that are now close friends of mine.

Lastly, I am a much more confident person within myself and I've met so many incredible people that have turned into friends.

"I have always been blown away by how much care and thought that Young Living put into everything they do."

What is your favourite Young Living product? Why? Explain what the benefits are to you.

Very hard question, but I would have to say Frankincense because of its impact it has on a person's overall well being. It's a staple in our home which is used in a variety of different ways. I'd also have to say the Thieves Household Cleaner because of the quality and results it provides. It cleans our home from top to bottom and we adore the aroma! It really is a powerhouse product!

Were you sceptical about essential oils and the Young Living opportunity before?

Before I knew much about essential oils, I only thought that they were something that made your house smell good. It wasn't until I used Frankincense that I realised how powerful they can be. I wasn't skeptical about the business opportunity, I was more unsure if I had the confidence in myself to do it. One of the things I have loved about this opportunity is all the room for personal growth that I now get to mentor other women too.

What changed your mind about Young Living?

Seeing the farms in action. I had always read about the Seal to Seal promise but seeing it in real life, speaking to the farmers and watching the distillation process was truly something spectacular. It really sealed the deal for me.

At what point did you decide to focus on Young Living full time?

When I had my son. I wanted to find something that allowed me to stay at home and also contribute. I was looking for something that I knew I would be passionate about sharing and Young Living was the right fit for me. I was already familiar with their products and passionate about natural living.

Why would you recommend others join Young Living?

I would recommend Young Living to others so they can better their own wellness and join a community that's going to support them in making small, simple changes in their life. If you were thinking about the business opportunity, I would encourage you to take a leap of faith and dive in.

"It's empowering to know that our wellness is in our hands and seeing other people follow in those footsteps is something really special."

What do you think is the most incorrect myth you heard about Young Living?

That Young Living oils are adulterated. It's completely untrue.

What would your response be to correct this myth if you heard it yourself?

Don't believe everything you read on the internet, go straight to the source.
