FINDING YOUR PERFECT SHADE

Savvy Minerals by Young Living® Eyeshadow comes in a variety of colours to complement every style and skin tone. The best way to find your perfect shade is to experiment, but a few guidelines can help you get started.

Shopping for your skin tone is the best place to start. If you have a warm undertone, look for shades with a peachy or golden colour, such as Spoiled or Unscripted. If your skin is cooler, choose shades that look more gray or blue, such as Determined or Wanderlust.

We also recommend having at least two shades - one light and one dark - for your everyday wear. The lighter shade

can be used for the brow bone and the darker shade (something close to your skin tone or slightly darker) can be used for the eyelid. While this method can help define your eyes and lids, many looks work best with three or four colours. Play with at least a few shades you love, so you always have ways to perfect your look.
