

Product Summary

More than just an aroma diffuser, Young Living's Dewdrop™ Diffuser also functions as a humidifier and atomiser in one simple-to-use product.

Inspired by the purity and elegance of a drop of morning dew, the Dewdrop™ Diffuser's design reflects Young Living's dedication to providing high-quality essential oils. Thanks to its satin-like finish, the Dewdrop Diffuser emits a soft, warm light, making it the perfect nightlight in every bedroom. The light can also be switched off and since the sound level is very low, this diffuser will carry even light sleepers off into the land of dreams!

Custom designed with up to four hours of continuous diffusion, automatic shut-off, and ambient light control, the Dewdrop™ Diffuser adds a touch of elegance to your home, office, or exhibition space while filling the air with the alluring scent of essential oils.

Primary Benefits and Features

- The ultrasonic frequency generates waves at 1.7 million times per second, releasing essential oil molecules into the air.
- Functions as an aroma diffuser, humidifier, and atomiser.
- Powerful action covering up to 30 square metres.

How to Use

1. Remove the outer lid by sliding your fingertips under the ridge where the white top meets the base. The top can then be easily lifted off the base.
2. Remove the inner lid and add water (tap or spring) until the water level reaches but does not exceed the red water fill line marker.

3. Add 5-8 drops of your favourite essential oil and put both lids back on so that the Young Living logo sits directly above the on/off button.
4. Plug in the power adaptor and press the button once to switch the diffuser on. Press it two times to switch off the light and three times to switch the diffuser off.

Cleaning

Please see user manual for full instructions.

Cautions

- Keep out of reach of children.
- Do not use distilled water or purified water.
- For all other safety and care information, please refer to the Dewdrop Operation Manual.

Works well with

- Bergamot Essential Oil
- Thieves Essential Oil Blend
- Purification Essential Oil Blend
- Everyday Oils Collection

Did You Know?

- The Dewdrop Diffuser will run a maximum of 4 hours on a full water reservoir.
- The ultrasonic frequency generates waves at 1.7 million times per second, releasing essential oil molecules into the air to help create a relaxing, spa-like atmosphere in your home or office.
- Tap or spring water contains mineral molecules that can conduct electricity and enable the diffuser to work properly. Purified or distilled water does not contain enough mineral molecules for the diffuser to function properly.
- An automatic shutoff feature allows the unit to cease running when the water reservoir is empty.
