nature."*

Cicero (106 BC–43 BC)

The Art of Young Living

Recovered accounts reveal that the most advanced civilizations of the ancient world, the Egyptians, Greeks, Romans and Chinese, relied upon the immense power of essential oils to regain, increase, or maintain health of the body and mind. Young Living is restoring this lost wisdom and helping people understand that essential oils and aromatherapy can do much more than soothe, invigorate, and uplift.

Based upon advanced scientific research, Young Living has combined the health secrets of the ages with the latest age refining technology to produce an amazing skin care system—A•R•T.

“By combining the timeless knowledge of essential oils with the latest skin care technology, Young Living has produced a system that will revolutionise the industry and provide extraordinary results. Our passion for purity, quality, and integrity guarantees your skin will benefit from the very best.”

Assessing Skin Damage

Through the ages, the beauty of the human form has inspired artists, and the very essence of that beauty is illuminated through a face. The delicate bone structure, natural features, and unique attributes help shape the human face and distinguish appearance. But, perhaps even more brilliant than the architecture of the human face is the soft, smooth, exquisite skin tone that makes a face so extraordinary, and so unforgettable.

Like any work of art, the natural process of aging can have a negative effect on the texture, tone, and appearance of skin. As we age, our skin is repeatedly exposed to harmful chemicals and damaging sunlight. Over time, this exposure causes significant damage to DNA, and eventually, the skin starts to thin, age spots appear, and uneven skin tone and wrinkle formation result. In fact, persistent DNA damage is the primary cause of aging on the skin.

Aging also weakens the body's ability to produce collagen. The dermis, which lies just beneath the top layer of your skin, consists of cells called fibroblasts that produce collagen and moisture. As skin matures, fibroblasts lose the ability to produce collagen, which causes the epidermis (or top layer of skin) to thin, and as a result, deeply bedded wrinkles occur. Advanced dryness also accelerates the formation of fine lines and wrinkles.

Collagen Rich

Healthy, dense collagen supports the epidermis and smoothes the surface of skin.

Collagen Deficient

Lack of collagen cannot adequately support the epidermis, and skin eventually starts to thin, wrinkle, and sag on the surface.

To actually restore your complexion's vibrant, youthful appearance, you must repair DNA, build healthy collagen, and maintain nourished and hydrated skin. Young Living has combined the newest DNA recovery technology with the latest collagen enhancing ingredients, creating a formula that can combat the visible signs of aging at the cellular level, renewing younger-looking skin.

is truly a work of A•R•T.*

The Beauty of A•R•T

*ART:
The conscious production
or arrangement of
sounds, colors, forms, movements,
or other elements
in a manner
that affects the sense of beauty.*

A superior concept in skin restoration, Young Living's A•R•T, Age Refining Technology, combines DNA recovery enzymes—an advanced science—with a proprietary Peptide Complex to reduce the look of fine lines, wrinkles, and age spots, even skin tone, and improve the thickness and firmness of your skin's appearance.

What's more, recognising the incredible power of essential oils, Young Living has added frankincense and sandalwood for their ability to revitalise skin. Add the moisturising and skin conditioning properties of the wolfberry seed oil, and you have the formula for a truly unique and effective skin care system.

Once again, Young Living has taken the finest ingredients and combined them with the latest skin care technology to create a system that restores youthful-looking skin.

Age Refining Technology is the art and science of skin care.

Key Features

1. Promotes superior skin recovery with two innovative enzymes and a proprietary blend of pure essential oils, which can enhance DNA repair and reduce premature aging of the skin.

- **Photolyase:** Light activated and suitable for day use. This enzyme uses visible light to enhance your skin's ability to replenish DNA segments in the damaged cell.
- **Endonuclease:** Uses energy in your body to cut the damaged DNA segment, reproduce the original segment before it was damaged, and insert the new segment back into the correct place in the cell's DNA structure.
- **Essential oils frankincense and sandalwood:** Support and sustain the skin's ability to renew DNA and revitalise skin.

2. Reduces the look of fine lines, wrinkles, and age spots by enhancing the production of collagen and elastin, and retaining moisture in the skin.

- Delivers a revolutionary Peptide Complex that includes Matrixyl™ 3000, which helps increase the density of the skin by producing collagen I, III, IV, and fibronectin by a factor of at least 200%.
- Provides vitamin C which, when combined with Matrixyl, produces a 50% greater increase in skin matrix regeneration than the Peptide Complex alone.
- Contains the legendary wolfberry seed oil for added moisturising properties.

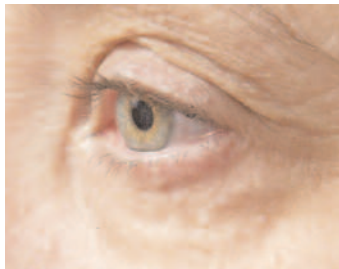

3. Advanced delivery technology ensures skin is getting the maximum benefit and a more efficient application.

- Laminar Phase technology delivers an equal amount of the active ingredients along the surface of the skin and forms a barrier that allows greater penetration and efficacy. This same barrier also retains moisture and helps protect the skin from the environment.
- Advanced Liposome technology delivers ingredients faster and in greater concentrations to the lower layers of the skin.

Before treatment

A combination of aging and sun exposure will damage DNA and inhibit the production of collagen, elastin, and moisture in the skin. This results in dry, rough, uneven skin texture with noticeable fine lines and wrinkles.

After treatment

Treating the skin with A-R-T delivers DNA recovery enzymes and essential oils, while stimulating the production of collagen and elasticity to help smooth, plump, and soften skin. A-R-T produces dramatic and noticeable results.

A•R•T Products

Gentle Foaming Cleanser

- Gently removes oil, dirt, and makeup without irritation or dryness.
- Utilises a quartet of pure essential oils to invigorate and revitalise skin.
- Leaves skin feeling fresh, hydrated, and soft.

Day and Night Cream

- Reduces the look of fine lines and wrinkles.
- Increases the thickness and firmness of the skin's appearance.
- Moisturises and conditions skin during the day.
- Soothes and nourishes skin at night.
- Water-based creams absorb quickly and leave skin feeling smooth, moisturised, and supple.

Purifying Toner

A necessary step in any comprehensive skin care regimen, Young Living's new Purifying Toner helps support cleansing by removing unwanted oil, dirt, and impurities that can accumulate on skin. Understanding the therapeutic benefits of pure essential oils in skin care products, Young Living has included frankincense and sandalwood for their ability to visibly revitalise skin, lemon and peppermint to cleanse and energise, and melissa and lavender to soothe and balance. This remarkable formula will purify and rejuvenate the skin's surface restoring a firm and healthy-looking complexion.

- Minimises oily shine.
- Enhances pH balance.
- Reduces the appearance of pores.
- Smooths and softens skin.

Recommended Use

After cleansing, sweep over face with a cotton ball. Can be used in the morning and again in the evening. For best results, apply the A-R-T Day Activator or Night Reconstructor cream over the Toner.
