About Young Living

After sustaining serious injuries in a logging accident, Gary Young began searching for natural alternatives to traditional medical treatments. He experimented with many different modalities, which helped him regain feeling in his legs and eventually enabled him to walk again. Although still in great pain, he began a path of helping others to heal themselves as well.

A few years later, he discovered nature's gift of essential oils. He became passionate about their potential and began conducting extensive research to discover their wonderful properties.

This research, combined with his years of farming experience, inspired Gary to learn to grow and harvest plants and trees for the extraction of their precious oils. He built his first extraction chamber in 1993; and in 1994 he built his first stationary distillery, where he developed a proprietary distillation technique to produce essential oils and Young Living Essential Oils was born!

Over the last two decades, Young Living has experienced remarkable growth. Gary has developed innovative farms and distilleries, and made amazing discoveries from ancient history and present-day science! Because of his commitment and dedication, Young Living stands as the world leader in essential oils.

Young Living is the only essential oil company that

owns, operates, and meticulously oversees its own farms and distilleries. With seven farms and six distilleries on four continents, partners across the globe who grow and distill for Young Living, and hundreds of thousands of customers around the world, we truly are the leaders in our field.

We are committed to fulfilling our mission: to champion nature's living energy, essential oils, by fostering a community of healing and discovery while inspiring individuals to purpose and abundance.

YOUNG LIVING AROUND THE WORLD

Young Living takes its vitality worldwide by shipping to over 100 countries. We currently have offices in the United States, Japan, the United Kingdom, Australia, Singapore, Peru, Canada, Ecuador and Hong Kong; and we anticipate opening one to two new markets every year for the next decade.

Experience Essential Oils

Essential oils are the aromatic liquids found within shrubs, flowers, trees, roots, bushes, resins, and seeds. These oils, also known as nature's living energy, contain unique constituents that provide results. Essential oils are extracted from plant sources using steam distillation and are highly concentrated, far more potent than dry herbs. Essential oils have been used throughout history by ancient cultures, and can be incorporated into modern daily life in a variety of ways, whether by inhalation, or topical use.

Young Living's dedication to quality ensures that we provide pure, essential oils with the complete, optimal blend of plant chemicals to ensure maximum potency and results.

See page 5 for more information on Young Living's Seed to Seal process.

Gary Young's commitment to quality ensures that Young Living produces pure, effective essential oils.

How to Use Essential Oils

Follow the guide below—along with the individual instructions on each label to experience the amazing benefits of essential oils.

INHALATION

Inhaling certain essential oils heightens the senses and can have many positive effects. Try these ideas to use essential oils for inhalation:

- Inhale directly from the bottle.
- Diffuse with any of Young Living's premium diffusers.
- Carefully pour hot water into a bowl and add a few drops of essential oil. Cover your head and bowl in a tent-like fashion with a towel. Breathe deeply and slowly.

TOPICAL APPLICATION

Many essential oils are safe to use directly on the skin:

- Place 2–3 drops of oil in the palm of your hand or directly on the desired application area. Massage the oil in a circular motion onto the skin. Repeat if desired.
- Use one of Young Living's essential oil roll-ons or add a Roller Fitment to your favourite essential oil for targeted application.

Caution: Always read the label for instructions before applying. Essential oils are very potent and some may be irritating to the skin. If irritation occurs, apply V-6 Vegetable Oil Complex or any pure vegetable oil to dilute.

Seed to Seal™

Young Living offers the purest, essential oils by carefully controlling the entire Seed to Seal process from the time the seed is sourced until the oil is sealed in the bottle.

OUR SEED TO SEAL COVERS FIVE CRUCIAL STEPS:

SEED

Potent essential oils come from plant species that have been authenticated by Young Living and industry experts through scientific research, field study, university partnerships, and on-site planting certification. Selecting seeds that produce the highest value is a vital first step in the Seed to Seal process.

CULTIVATE

Young Living's knowledge of soil preparation, balance of sun and water, responsible weed and pest control, and wild-craft harvesting ensures that stringent standards are met. We continue to conduct research and remain dedicated to growing the highest-quality aromatic plants.

DISTILL

Young Living's proprietary low-temperature, low-pressure steam distillation process ensures that the beneficial plant compounds in every batch of essential oil remain uncompromised during the extraction process. This process is completed at just the right time to ensure all beneficial constituents are present to maximise the quality of the oil.

TEST

Each batch of distilled oil passes through stringent testing—at our own internal labs and in third-party audits—to ensure its purity and potency. Each oil is tested during various stages of distillation to determine the release of different plant constituents.

SEAL

Young Living completes the Seed to Seal process by carefully sealing and inspecting each bottle of essential oil at our own clean-room facility and shipping to members worldwide. Individual bottle labels are encoded with detailed tracking information that allows Young Living to trace each bottle of essential oil back to its source.

For more detailed information on the Seed to Seal process, visit www.youngliving.com

Young Living Farms

Having Young Living's farms allows us to control the growing, distilling, sourcing, and testing of our essential oils. Gary Young personally travels the globe to locate prime farm land that provides the optimal climate, soil, and growing conditions for the plants that become Young Living's essential oils. Having our own farms allowed us to develop our exclusive Seed to Seal process, which ensures that each Young Living product delivers the world-class quality customers have come to expect.

ST. MARIES, IDAHO, USA

These 200 acres of pristine farmland were purchased by Gary in 1992. The property had never before been ploughed or subjected to chemicals, pesticides, or fertilisers of any kind. The soil, climate, and pure air make it an ideal location for crops such as lavender, melissa, and tansy.

MONA, UTAH, USA

This farm encompasses nearly 1,600 acres and is home to the largest, privately owned essential oil distillery in the world. Roman chamomile, hyssop, clary sage, golden rod, and lavender are grown for distillation for our world market, and many other crops are grown here for research and display.

HIGHLAND FLATS IN NAPLES, IDAHO, USA

Since 2000 the Highland Flats farm has produced Young Living's balsam oil. This farm is the site of our annual Balsam Harvest, where many distributors join us for the hard, but rewarding, work of harvesting and chipping the overgrown balsam fir trees and then transporting the chips for distillation in St. Maries. However, if you don't make it to the harvest, you can join us for the annual spring reforestation project, where thousands of young balsam fir trees are planted each year to replace the harvested overgrowth and secure our future supply.

SIMIANE-LA-ROTONDE, FRANCE

Well-known for its rolling hills and farms of fragrant lavender, the region of Provence, France, is home to Young Living's third farm, the only American-owned lavender farm in the country. The farm produces lavender, lavandin, rosemary, and clary sage.

GUAYAQUIL, ECUADOR

Since 2005 Young Living has operated a farm in Guayaquil, Ecuador. Plants that are grown, harvested, and distilled here include eucalyptus blue, dorado azul, zaragosa, lemongrass, rosa morta, oregano, ylang ylang, basil, and many more. The plant material of palo santo, ruta, rosewood, and ocotea is transported to the farm from different areas of Ecuador and Peru for distillation. The Ecuador farm's state-of-the-art distillery is the largest in South America.

SALALAH, OMAN

In 2010 Gary started his operation for the extraction of *Boswellia sacra*, sacred frankincense, in Salalah, Oman. Young Living has contracted with local harvesters to secure our supply of this resin and acquired farm acreage in Oman to increase cultivation and meet the growing demand for this precious oil. For the first time in centuries, *Boswellia sacra* is being distilled in Oman, and Young Living is the first and only company in the world to obtain permission to export this precious oil.

PUCALLPA, PERU

Gary is currently looking for suitable areas for building another farm for the production and distillation of rosewood oil and other new oils from the Amazon.
