SUSTAINABILITY, QUALITY, AND PURPOSE

We live in a manufactured world as we deepen the divide between ourselves and the great outdoors. From pine-scented candles to peppermint toothpaste, our homes are filled with products that contain only trace remnants of the natural world. Instead of turning to man-made synthetics to solve our problems, we're turning back to nature to live healthier, cleaner lives.

As the leader in the modern essential oils movement, Young Living has paved the way toward greener living by blending nature and innovative and proprietary technology to draw us closer to the world around us. For over 25 years, we've defined what it means to deliver the most pristine, potent oils on the market. That quality relies on our Seed to Seal® quality commitment, ensuring that every product reflects our rigorous, thoroughly tested, top-to-bottom quality approaches.

With a 99 percent landfill-free status, a trophy shelf of clean building awards, and more than 2,500 harmful mainstream chemicals banned from our product formulations, we help you reduce your harsh chemical footprint while simultaneously eliminating our own. Our planet takes care of us, and we return the favor with recycling, waste-cutting, regenerative agriculture, and more to deliver products to your home using the most responsible and sustainable methods.

The synthetic world we live in might be what we're used to, but we aren't confined to the material world. Ancestral knowledge about the workings of nature is all around us. By connecting and learning from the natural world, we live in harmony with the planet and have the potential to elevate and transform our lives.

SEED TO SEAL

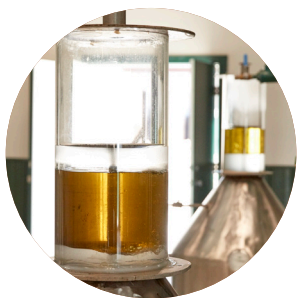

OUR QUALITY COMMITMENT

We created Seed to Seal® as a set of rigorous quality benchmarks that put people and planet first. Seed to Seal's three pillars—Sourcing, Science, and Standards—let you fall in love with Young Living products knowing that inside each bottle, tube, box, or bag is a powerful product with a sustainable story.

SOURCING

Quality products come from quality sources. That's why we work exclusively with Young Living corporate-owned farms, partner farms, and Seed to Seal-certified suppliers around the globe, so we can source conscientiously and prioritize quality as well as community and ecological impact. Our sourcing philosophy means that you never have to choose between quality and conscience.

SCIENCE

Purity starts in the field, but it's proven in the lab—two in-house labs and more than a dozen leading independent labs, to be exact. Every batch of Young Living essential oil undergoes advanced purity and efficacy testing and retesting by the 50+ highly trained scientists at our D. Gary Young Research Institute. Products that aren't pure enough or powerful enough—or that simply aren't perfect—never make it to your home.

STANDARDS

Our decades of leadership mean that we're responsible for setting—and surpassing—the definitive green standard for others to follow. This requires a rigorous commitment to environmental standards that put people and the planet over profits. We proactively design, evaluate, and regulate our process to ensure we do things the right way.

SOCIAL IMPACT

As guardians of people and the earth, we're committed to helping our world thrive for generations to come. Your support empowers us to make a lasting impact through The D. Gary Young, Young Living Foundation; supply chain integrity; and responsible farming practices.

Seed to Seal informs and inspires everything we do. For more detailed information on our Seed to Seal pillars, please visit SeedtoSeal.com.

THE FARMS

While our modern world is a miracle of engineering, it hasn't been such a miracle for our planet. Today's farming practices produce contaminated, modified crops and products that would be unrecognizable to our ancestors. To provide the most potent and nutritionally dense products on the market, we're going back to our farming roots, valuing quality over quantity.

When our founder, D. Gary Young, started the modern essential oils movement, he knew we couldn't harvest from farms that produced low-quality crops. Instead, he built his own farms. Unlike many commercial farms, Young Living's farms have never been sprayed with glyphosate—commonly known as Roundup—or any other harsh chemicals. This ensures the source of our botanicals is as pristine as possible.

At our many corporate-owned farms around the world, you can find a fusion of ancient and modern farming practices that ensures that the natural essence of each plant is honored and preserved from start to finish. This is the foundation of our Seed to Seal® quality commitment, which backs every essential oil and ingredient-based product we deliver to your home. From the trusted sources of our essential oils and select product ingredients to innovative, science-backed proprietary formulas and rigorous quality tests, we set and exceed the highest quality standards. Seed to Seal is governed by the activities defined within our three guiding pillars: **Sourcing, Science, and Standards.**

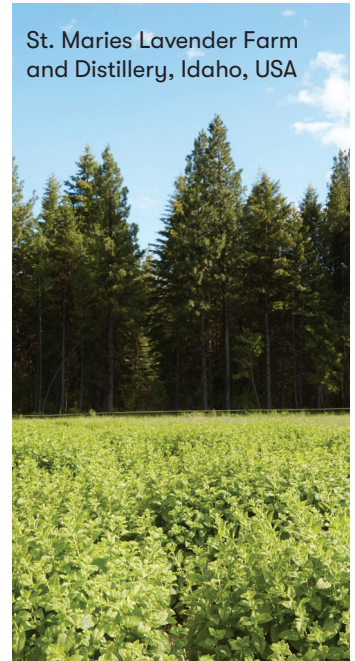

This rigorous quality commitment ensures that the products in your home are as clean as nature intended, helping you connect back to the planet while doing your part to keep it green. Now with more than 20 farms across six continents, Young Living has set the standard for sustainable farming practices around the globe.

HOW TO USE YOUNG LIVING® ESSENTIAL OILS:

Three main methods

Aromatically

All Young Living essential oils feature a signature aroma you can smell for a wide variety of benefits. One oil's crisp scent can be invigorating, while another's soothing aroma can help you unwind after a long day. Here are some ways to experience the aromatic benefits of a Young Living essential oil:

- Inhale directly
- Use with a diffuser
- Mix with your DIY cleaners

Topically

Applying essential oils topically allows your skin to absorb the benefits. Visit our website product pages for suggested uses to explore or start with these tips:

- Apply on your feet, wrist, chest, or neck
- Add to your moisturizer or other personal care products
- Use in a massage

Safety tip: Follow each oil label's dilution instructions; many oils need to be diluted with a neutral carrier oil like olive oil or coconut oil. Also, be aware that some oils, particularly citrus, can cause photosensitivity in the sun and are best applied at night.

Internally

Seasoning your favorite recipes with our specially labeled essential oil flavorings lets you savor all their spicy, herbaceous, fruity potential. Here are the ways to take essential oil flavorings internally:

- Add to a glass of water or beverage
- Use a drop in place of herbs, zest, or juice when cooking

Safety tip: Be sure to start small—a little goes a long way! Always make sure the oil is specifically labeled for ingestion; otherwise, assume it's safe for external use only.
