You are embarking on an exciting journey as you begin to discover the wonderful benefits of the Young Living products. Each new product you try has the possibility of helping you have a greater awareness of your physical, mental, and/or spiritual needs. This can be a wonderful adventure for you as you experience new beginnings and travel a path of greater wellness, helping you to reach your highest potential.

My logging accident at the age of 24 left me confined to a wheelchair for life, according to all medical prognosis. When I decided that I would not live that way, I was driven to find natural ways to heal myself. That belief and determination took me down an unknown path and led to what Young Living has become almost 40 years later.

I used many natural modalities to begin my journey of walking again. Thirteen years later I was able to run a half marathon and finished 96th out of 300 in that race. That was a great new beginning for me, although I was still limited in my activities and suffered with a lot of pain. At the same time, almost 13 years after my accident, I discovered essential oils, which has been life changing for me and helped me restore my body, enabling me to help and give hope to others.

This new guide will help you customize your Young Living experience. Whether you want to fill your Home with safe, purifying products; strengthen your physical Wellness; improve your emotional Balance; or enhance your natural Beauty, Young Living’s 100% pure, therapeutic-grade essential oils and essential oil-infused products will help you on your journey. When you can help yourself, your family, and friends and meet your financial needs at the same time, you have the best of both worlds.

Mary and I invite you to join us in our mission—to take Young Living Essential Oils to every home in the world. Together we can help each other and help those less fortunate to achieve a healthier and happier lifestyle filled with success and prosperity.

Sincerely,

Mary and Gary Young

**How to Order .................................................... 69**
Essential oils are the aromatic liquids found within shrubs, flowers, trees, roots, bushes, resins, and seeds. These oils, also known as nature’s living energy, contain unique constituents that provide therapeutic results. Follow the guide below—along with the individual instructions on each label—to experience the amazing, health-promoting benefits of essential oils.

**Inhalation**
Inhaling certain essential oils heightens the senses and can have many positive effects on the body. Try these ideas to use essential oils for inhalation:
- Inhale directly from the bottle.
- Diffuse with any of Young Living’s premium diffusers.
- Carefully pour hot water into a bowl and add a few drops of essential oil. Cover your head and bowl in a tent-like fashion with a towel. Breathe deeply and slowly.

**Topical Application**
Many essential oils are safe to use directly on the skin:
- Place 2–3 drops of oil in the palm of your hand or directly on the desired application area. Massage the oil in a circular motion onto the skin. Repeat if desired.
- Use one of Young Living’s essential oil roll-ons or add an AromaGlide fitment to the bottle of your favorite essential oil for targeted application.

*CAUTION: Essential oils are very potent and some may be irritating to the skin. If irritation occurs, apply Young Living’s V-6 Vegetable Oil Complex or any pure vegetable oil to the area to dilute.*

**Internal Consumption**
Some essential oils make excellent dietary supplements or food flavorings. To take essential oils internally, try these tips:
- Place several drops into a gelatin capsule and swallow it with water.
- Add 1–2 drops to a glass of water, NingXia Red or other natural juice, or even yogurt.
- Add 1–2 drops (to taste) to your meals when cooking.
- Add 1–2 drops to a teaspoon of Young Living Yacon or Blue Agave and swallow.

*Please Note: For specific application guidelines, see page 10.*
Seed to Seal

Young Living offers the purest therapeutic-grade essential oils by carefully controlling the entire Seed to Seal® process—from the time the seed is sourced until the oil is sealed in the bottle. Young Living’s dedication to quality ensures that we provide pure, therapeutic-grade essential oils with the complete, optimal blend of plant chemicals to ensure maximum potency and results.

Our Seed to Seal process covers five crucial steps:

**Seed**

Potent essential oils come from plant species that have been authenticated by Young Living and industry experts through scientific research, field study, university partnerships, and on-site planting certification. Selecting seeds that produce the highest therapeutic value is a vital first step in our Seed to Seal process.

**Cultivate**

Young Living’s knowledge of soil preparation, balance of sun and water, responsible weed and pest control, and wild-craft harvesting ensures that stringent standards are met. We continue to conduct research and remain dedicated to growing the highest quality aromatic plants.

**Distill**

Young Living’s proprietary low-temperature, low-pressure steam distillation process ensures that the beneficial plant compounds in every batch of essential oil remain uncompromised during the extraction process. This process is completed at just the right time to ensure all beneficial constituents are present to maximize the quality of the oil.

**Test**

Each batch of distilled oil passes through stringent testing—at our own internal labs and in third-party audits—to ensure its purity and potency. Each oil is tested during various stages of distillation to determine the release of different plant constituents.

**Seal**

Young Living completes our Seed to Seal process by carefully sealing and inspecting each bottle of essential oil at our own clean-room facility and shipping to members worldwide. Individual bottle labels are encoded with detailed tracking information that allows Young Living to trace each bottle of essential oil back to its source.

For more detailed information on our Seed to Seal process, visit youngliving.com.
Young Living takes its vitality worldwide by shipping to over 100 countries. In 2013 we formally opened Canada and Germany and anticipate opening Hong Kong by the end of 2013. Other recent market openings include Ecuador, Peru, and Singapore, bringing us one step closer to achieving our goal of having Young Living essential oils in every home. We currently have offices in the United States, Japan, the United Kingdom, Australia, Singapore, Ecuador, Peru, and Canada, and we anticipate opening multiple new markets every year for the next decade.

Young Living Farms
Having Young Living farms allows us to control the growing, distilling, sourcing, and testing of our essential oils. Gary Young personally travels the globe to locate prime farms that provide the optimal climate, soil, and growing conditions for the plants that become Young Living’s essential oils. Having our own farms and partnering with carefully selected cooperative farms allows us to develop our exclusive Seed to Seal® process, which ensures that each Young Living product delivers the world-class quality customers have come to expect.
These 200 acres of pristine farmland were purchased by Gary in 1992. The property had never before been plowed or exposed to chemicals, pesticides, or fertilizers of any kind. The soil, climate, and pure air make it an ideal location for crops such as lavender, melissa, and tansy.

This farm encompasses nearly 1,600 acres and is home to the largest privately owned essential oil distillery in the world. German chamomile, hyssop, clary sage, golden rod, and lavender are grown for distillation for our world market, and many other crops are grown here for research and display.

Since 2000 the Highland Flats farm has produced Young Living’s balsam fir, Western red cedar, pine, and Idaho blue spruce oils. This farm is the site of our annual Winter Harvest, where many distributors join us for the hard, but rewarding, work of harvesting and chipping the overgrown balsam fir, Western red cedar, and pine trees and then transporting the chips for distillation in St. Maries. Soon, these oils will be produced on site at the Highland Flats distillery that is currently being constructed. Distributors may also join us for the annual Spring Reforestation project, where thousands of young balsam fir and Idaho blue spruce trees are planted each year to replace the harvested overgrowth and secure our future supply.

Well known for its rolling hills and fields of fragrant lavender, the region of Provence, France, is home to Young Living’s scenic third farm. With help from local partners, this farm produces lavender, rosemary, and clary sage.

Since 2005 Young Living has operated a farm in Guayaquil, Ecuador. Plants that are grown, harvested, and distilled here include eucalyptus blue, dorado azul, zaragosa, lemongrass, rosa morta, oregano, ylang ylang, basil, and many more. The plant material of palo santo, ruta, rosewood, and ocotea is transported to the farm from different areas of Ecuador and Peru for distillation. The Ecuador farm’s state-of-the-art distillery is the largest in South America.

In 2010 Gary started his operation for the extraction of *Boswellia sacra*, Sacred Frankincense, in Salalah, Oman. Young Living has partnered with local harvesters to secure our supply of this exclusive resin and increase cultivation to meet the growing demand for this precious oil. For the first time in centuries, *Boswellia sacra* is being distilled in Oman, and Young Living is the first and only company in the world to obtain permission to export this essential oil and bring it into the Western world.

In partnership with a local grower, Young Living has established a farm and distillery in Almog, Israel. This property, located near the Dead Sea, is the site of pioneering botanical research and the source of the 2013 convention-exclusive Micromeria essential oil.

Following two research trips to Taiwan, Gary began an agricultural partnership in 2012 with local doctor Ginn S. Lee to produce Hong Kuai and Xiang Mao essential oils on a scenic property in the Taitung region. These two 2013 convention-exclusive essential oils are some of the rarest in the world and are deeply significant to Taiwanese citizens.

Thieves

Thieves® essential oil blend was inspired by the legend of four 15th-century French thieves, who formulated a special aromatic blend composed of clove, rosemary, and other botanicals to use while robbing the dead and dying.

Young Living’s one-of-a-kind Thieves blend, crafted in the spirit of that legendary blend, can be found in many of our most popular products and is a safe, natural alternative to harsh chemicals and cleaners.

Thieves blend combines pure clove, cinnamon bark, rosemary, lemon, and eucalyptus (E. radiata) essential oils and has been university tested and proven to be 99.9 percent effective at killing airborne bacteria. The antibacterial properties of Thieves inspired an entire line of natural home and body products, including oral care, hand care, and household cleaning solutions.

Titanium Cookware

Young Living’s premium titanium cookware is energy efficient and helps food retain maximum nutrients, enzymes, and flavor. Featuring a nonporous, nonstick, abrasion-resistant surface, these pans are designed for easy cleaning and maintenance. The hand-cast alloy surface conducts heat seven times faster than steel, allowing it to retain heat longer, reach a higher temperature, and distribute heat evenly. The thick Thermobasic base prevents warping, even after years of use.
