

Product Summary

ImmuPro™ has been specially formulated to provide exceptional immune system support when combined with a healthy lifestyle and adequate sleep to support the body's needs.*

This power-packed formula combines naturally-derived immune-supporting Ningxia wolfberry polysaccharides with a unique blend of reishi, maitake, and agaricus blazei mushroom powders to deliver powerful antioxidant activity to help reduce the damaging effects of oxidative stress from free radicals.*

ImmuPro provides chelated minerals which emerging science suggest are more easily absorbed by the body, including zinc and selenium for proper immune function.* It also delivers melatonin which encourages restful sleep by promoting the body's natural sleep rhythm.*

With non-GMO dextrose instead of fructose and more Orange essential oil than ever, this formula delivers more of what you want and less of what you don't! This delicious fruit-flavored chewable supplement also has the same great wolfberry flavor now with a crunchier texture.

Who Should Use ImmuPro?

- ImmuPro is great for everyone who want immune system support!*
- Great for those with taxing schedules including parents, professionals and students.

Did You Know?

- "Reishi mushroom" translates to "supernatural mushroom" and "Maitake" translates to "dancing mushroom."
- Reishi mushroom has been used in traditional Chinese medicine for more than 2,000 years.
- The Maitake mushroom grows in clusters at the base of trees, particularly oaks and is commonly known among English speakers as hen-of-the-woods, ram's head and sheep's head.
- NingXia Wolfberries are grown in remote areas in China and have traditionally been used as a "superfruit."
