

PRODUCT SUMMARY

Need high-quality protection from the sun? Now you can enjoy long hikes and days at the beach while protecting your skin! Young Living's Mineral Sunscreen Lotion is now available in SPF 50, formulated to protect you from both UVA and UVB rays. This new product features naturally derived plant- and mineral-based ingredients and is water-resistant. If you use this sunscreen as directed with other sun protection measures, it decreases the risk of aging skin. Keep your skin protected in all kinds of sunny weather with this sunscreen!

KEY INGREDIENTS

Non-nano zinc oxide, Sunflower oil, Helichrysum essential oil, Lavender essential oil, Carrot Seed essential oil, and Frankincense essential oil

EXPERIENCE

Try our easy-to-apply, fast-absorbing sunscreen anytime you're outside. This lightweight mineral sunscreen lotion leaves you residue-free, with skin that's both protected and moisturized! Give your body the treatment—and protection—it deserves!

PRODUCT BACKGROUND

Our Mineral Sunscreen Lotion SPF 50 expands our over-the-counter line with a high SPF product. It's perfect for all skin types and uses naturally derived ingredients. It contains 22 percent non-nano zinc oxide and a blend of 100 percent pure, therapeutic-grade essential oils specifically designed by D. Gary Young. It's a naturally derived, chemical-free formula alternative to many other sunscreens on the market.

BENEFITS & FEATURES

- Provides powerful, chemical-free protection
- Non-greasy, matte finish
- Helps prevent sunburn for all skin types, including sensitive skin
- Reef safe
- Water and sweat resistant up to 80 minutes
- Formulated without avobenzone, oxybenzone, retinyl palmitate, parabens, phthalates, petrochemicals, PABA and 1,4-dioxane, UV chemical absorbers, artificial colors, or synthetic fragrances
- The Skin Cancer Foundation recommends this product as an effective broad spectrum sunscreen

†100% pure, therapeutic-grade essential oil

FREQUENTLY ASKED QUESTIONS

Q. What are UVA and UVB rays? Does this sunscreen provide protection from both types?

A. Sunlight consists of two types of rays that reach the earth: UVA rays and UVB rays. The American Academy of Dermatology says it is important to choose a sunscreen that blocks both types of rays. Our Mineral Sunscreen Lotion provides broad-spectrum protection, which means it protects from both UVA and UVB rays.

Q. What does SPF mean?

A. SPF stands for "sun protection factor," and it measures how well a sunscreen protects the skin from UVB rays. Since SPF values don't include UVA protection, it's also very important to choose a sunscreen that offers broad-spectrum protection, like our Mineral Sunscreen Lotion. This means that the sunscreen also blocks UVA rays.

Q. Can this sunscreen be used on the face?

A. Yes; our Mineral Sunscreen Lotion provides safe and effective sun protection for the face and body.
