Product Summary

Slique Slim Caps are a revolutionary weight-management product that features two patent-pending capsule formulations. The powder cap contains premium, soluble glucomannan fiber from the konjac root, ocotea fines, and fucoxanthin, which may help induce feelings of satiation.* The liquid cap blends citral-dense essential oils with pomegranate seed and coconut oil, which may support metabolic activity and diminish appetite triggers.* These ingredients have been studied for their benefit in a weight-management regimen. Together these innovative caps may help reduce one’s appetite and over indulgence.*

As part of the Slique line of products, Slique Slim Caps are formulated with unique, natural ingredients to help you obtain your individual weight-management goals when combined with diet and physical activity.

Primary Benefits

- May help increase feelings of fullness and decrease appetite*
- May induce feelings of satiation*

Who Should Take Slique Slim Caps?

- Individuals looking to decrease excessive eating and over indulgence
- Anyone interested in decreasing appetite triggers
- Anyone interested in increasing feelings of fullness

Suggested Use

Take 1 packet (3 capsules: 1 liquid cap and 2 powder caps) 45 minutes before your largest 2 meals of the day with 8–12 oz. of cold water.

Cautions

- Take this product as recommended.
- Failure to drink enough liquid may cause the product to swell in the throat and cause blockage or choking.
- Avoid use if you have ever had esophageal narrowing or problems swallowing capsules.
- Do not open capsules and sprinkle over food.
- Keep out of the reach of children.
- If you are pregnant, nursing, taking medication, or have a medical condition, consult a health professional prior to use.
Did You Know?

- Once dissolved in the stomach, the powder cap content absorbs water and expands to induce feelings of fullness.
- Punicic acid is found in pomegranate seed oil and has been studied for its support of healthy lipid levels in the blood.*
- Glucomannan is a soluble dietary fiber derived from the konjac root, a tuber native to Asia.
- Fucoxanthin is a type of cartenoid found in brown seaweed that is being studied for its possible role in supporting weight management.
- 32 million more Americans will become obese by 2030, increasing obesity rates to 42 percent of the U.S. population, according to a May 2012 report from the U.S. Centers for Disease Control and Prevention.
