[†]100% pure, therapeutic-grade essential oil

FREQUENTLY ASKED QUESTIONS

Q. Why is alcohol used as an ingredient in Thieves Spray?

A. The alcohol helps blend the ingredients together, so they distribute evenly. Alcohol also helps preserve the formula. The alcohol in Thieves Spray is denatured by treating it with Cinnamon Bark essential oil to prevent people from consuming it orally. Alcohol treated with essential oils is non-toxic. Most companies denature alcohol with chemical additives; we use essential oils to create a better alternative.

Q. Are there types of surfaces on which I should not use Thieves Spray?

A. Thieves Spray is safe to use on most non-porous surfaces. This includes stainless steel, tile, glass, varnished wood surfaces, and more. Surfaces such

as granite and marble are not always non-porous and should be tested in an inconspicuous area first. We recommend not using Thieves Spray on vinyl or soft plastic.

Q. Can Thieves Spray be used on areas of the body?

A. We do not recommend using Thieves Spray on the body. This product is formulated to clean surfaces such as kitchen counters, public seating, door handles, etc. For cleaning skin with the benefits of Thieves, we recommend using Thieves Cleansing Soap or Thieves Foaming Hand Soap.
