FREQUENTLY ASKED QUESTIONS

Q. Can Thieves Laundry Soap be used to pretreat dirt and stains on clothing?

A. Absolutely! This plant-based formula can be applied directly to fabric. Just pour a small amount of detergent onto your clothing, gently rub, and then soak.

Q. What are optical brighteners and why should they be left out of detergent?

A. Optical brighteners can be found in multiple popular laundry detergents and merely give clothing the appearance of being clean. By reflecting blue light, optical brighteners give the illusion of whiter-looking fabrics. The design of these chemicals is to absorb

directly into fabrics and remain on clothes well after washing. Thieves Laundry Soap contains none of these synthetic chemicals and leaves no synthetic residue.

Q. Is Thieves Laundry Soap perfumed?

A. Some people consider synthetic perfumes to be problematic because companies aren't required to disclose the exact ingredients in the fragrances. As the world leader in essential oils, we prefer to work with the refreshing scents of the pure essential oils that set us apart. Bergamot, Jade Lemon, and the essential oils in our Thieves blend provide a refreshing scent without any hidden synthetic fragrances.
