

## PRODUCT SUMMARY

AgilEase is a joint health supplement that is perfect for individuals who are looking to keep up their active lifestyles by supporting joint mobility and flexibility. Formulated with ingredients that support joint health. Its unique and powerful ingredients such as boswellic acid distilled from frankincense resin, UC-II undenatured collagen, hyaluronic acid, calcium fructoborate, and a specially formulated proprietary essential oil blend are known for their joint health benefits. Take AgilEase to improve joint health or as a preventative measure to protect joint and cartilage health. It is especially beneficial for athletes and active individuals of all ages who want to support their joints and cartilage.

## PRODUCT BACKGROUND

The frankincense powder in this formula is the natural byproduct of steam distillation of our Frankincense (*Boswellia sacra*) essential oil. Our frankincense is grown on our Young Living Salalah Farm in Salalah, Oman, where we've secured special permission to export this valuable commodity. The essential oil blend in AgilEase utilizes our exclusive Northern Lights Black Spruce (*Picea mariana*) from Young Living's Northern Lights Farm in British Columbia, Canada.

## IMPORTANT

If you are on chronic medication or diagnosed with a chronic condition, contact your healthcare practitioner before taking any supplement. Discontinue use immediately if any adverse reactions occur and contact your healthcare practitioner. Use as directed or as otherwise prescribed by a healthcare practitioner. If pregnant or lactating, or have a medical condition, consult your healthcare practitioner before taking this or any other supplement.

## FAQ

**Q. Does AgilEase need to be taken daily or as needed?**

How soon can I expect results from AgilEase and what should I expect?

A. AgilEase is designed with ingredients that deliver results within the first few weeks of beginning a daily regimen and other ingredients that will take longer to take effect but will continue to increase in benefit the longer you use it. Best results are found when taken continuously at least for 12 weeks. You can expect to experience relief from acute joint discomfort and a healthier response to inflammation during exercise, allowing you to enjoy better flexibility and mobility.

**Q. How is AgilEase different from similar competitors' products?**

A. The primary difference between AgilEase and competitors' products is the inclusion of boswellic acid distilled from Young Living's frankincense resin, hyaluronic acid, and calcium fructoborate. Additionally, our competitors do not offer UC-II undenatured collagen in their joint supplements.

## BENEFITS & FEATURES
